FULL STACK WEB DEVELOPER

As a highly skilled full-stack developer with at least three years of experience, I am adept at developing robust, scalable, and maintainable web applications. My expertise in front-end and back-end technologies allows me to deliver end-to-end solutions that meet and exceed clients' expectations. I have a proven track record of developing dynamic and responsive user interfaces using primarily React as my go-to front-end framework of choice and developing complex server-side logic using Node.js. With excellent communication skills and a collaborative mindset, I am confident in my ability to contribute to the success of any development team. This summary showcases the candidate's technical skills, experience, and expertise in front-end and back-end development and proficiency with relevant tools and technologies. It also highlights the candidate's strong communication and collaboration skills, essential for working effectively in a team-based development environment.

Front-End Development

- HTML5, CSS3, JavaScript (*ES6+*), TypeScript, CSS Frameworks (*Bulma, TailwindCSS*), CSS Preprocessors (*SCSS / SASS*), JAMstack (*NextJS, NuxtJS, GatsbyJS*), Front-End Frameworks (*React, Vue*), React Native, Testing (*Jest, Cypress, React Testing Library*)

Back-End Development

- PHP, Python, NodeJS, GraphQL

Database Administration

- MariaDB / MySQL, PostgreSQL

Version Control

- Git (*Github*)

Server Administration / DevOps

- Operating Systems (*Linux, Unix, Windows*), Terminal (*BASH*), Security and Protocols (*HTTP, HTTPS, FTP, SSL/TLS, SSH*), Virtualization (*Docker*), Web Servers (*Nginx, Apache*)

PROFESSIONAL EXPERIENCE
